

Theory Exam Guidelines

THEORY EXAM

- **Closed book:** The exam is closed book.
- **Number of questions:** There are 67 questions in the exam and only one correct answer for each.
- **Calculator:** No calculators are allowed in the exam.
- **Time:** The exam is going to run for 2 hours, you cannot enter the exam if you come after 30 minutes late. You cannot leave the exam hall unless half the time is over.

Practical Exam Guidelines

ALLOWED RESOURCES

- **Slides, Labs & Exercises' Official Solutions:** All official materials provided during the stage from the academy.
- **Personal Notes:** Non-code notes only (e.g., comments written in the labs by the student, pdf summarizing the functions in each lab, pdf for practical configurations choices).
Exception: It is allowed to use a notebook to collect/organize codes copied from the labs.
- Your practical exam solution should consists **ONLY** of codes copied/modified from the official labs/exercises OR written by you during the exam.

PROHIBITED ITEMS

- **Pre-written Code:** Codes written prior to the exam (this includes: any AI/non-AI generated codes outside the labs/exercises, exercises solutions written by students, any prewritten function/dataset class outside the labs).
- **AI Tools:** No use of AI-assisted tools (ChatGPT, Gemini, etc.).

EXAM STRUCTURE

The exam consists of **four questions** in 3 hours:

Questions 1 (15 marks), 2 (15 marks), and 3 (12 marks)

- **Base Tasks:** Apply lab logic to new datasets or configurations.
- **One Bonus Task:** A challenging extension of lab concepts.

Bonus Question 4 (5 marks)

- **Optional Bonus:** An additional, entirely optional problem.

Note:

Model accuracy doesn't matter as long as it is not been asked explicitly in the task. You will be evaluated only on successfully coding and running the task.

GRADING CRITERIA FOR EACH TASK IN EACH QUESTION

Score	Definition
100%	Code runs perfectly, produces the correct output, and follows optimal logic.
25%–75%	Partial Credit: The code is generally correct but contains syntax errors or logical mistakes.
0%	No code was submitted or written.
-50%	The code uses an entirely incorrect approach, is a blind copy-paste, or disregards specific instructions (e.g., using a different dataset).

Note: The bonus tasks/question don't have negatives. Also the 4th bonus question doesn't have partial grade (you get either zero or full).
